

# Release notes version 4.17.4

## Sentinel library changes

The Sentinel home page has been refreshed and updated, and now includes links to different areas of the library to make navigation easier.

Previous Sentinel homepage

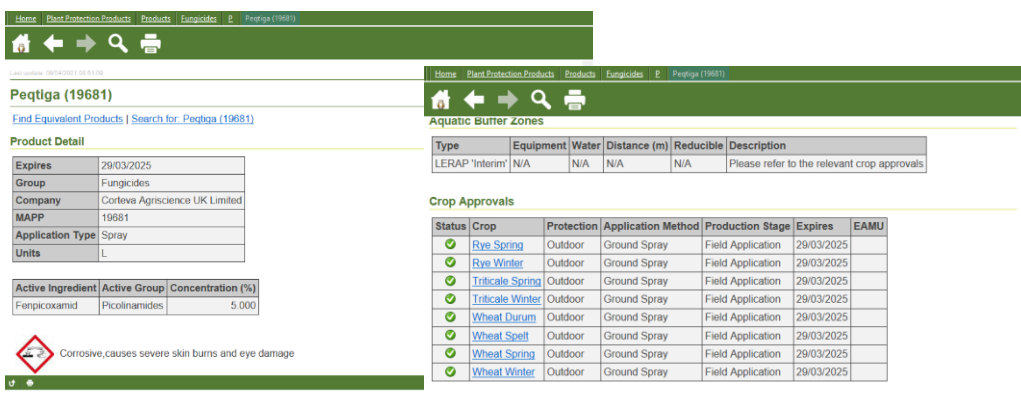

Updated Sentinel homepage

Users can now navigate to the following library sections directly from the home page:

- Product guides
- Variety listings
- Crop nutrition hub
- Photo library

For Sentinel Active customers, product pages have been refreshed with an updated display, which includes bringing crop approvals up the page so that users no longer have to scroll to see approved crops:

Previous 2-step display of crop approvals

		✓	Wheat Spelt	4/11/2031		Outdoor	Ground Spray	Field Application
		✓	Wheat Spring	4/11/2031		Outdoor	Ground Spray	Field Application
		✓	Wheat Winter	4/11/2031		Outdoor	Ground Spray	Field Application

Active Ingredient	Active Group	Concentration (%)
Fenpicoxamid	Picolinamides	5.000

Corrosive, causes severe skin burns and eye damage

*New page layout for easier access to approved crops*

This change has also included the addition of a left-to-right scroll bar to improve access when Gatekeeper is viewed on smaller screens.

All tables and tabulated pages benefit from a cleaner and fresher display:

*New table layouts and formatting*

## Sentinel library contents

In addition to updating and refreshing the appearance of Sentinel, a number of changes have been made to the content of the library itself.

The photo libraries of common weeds, pests and beneficials, and crop diseases are now easier to navigate to.

The crop nutrition hub has been updated to include copies of the RB209, rather than extracts, and also contains a number of Scottish Technical Notes with the relevant equivalent information.
